BOOST YOUR KID'S CHANCE FOR SUCCESS.

Start young. Have fun.

Many great motorsport champions started out racing karts. At Rotax, we believe electric racing classes have a great future. And that learning how to drive e-karts prepares kids for the future career. E-karts's boost is a blast to drive and mastering it is a boost for aspiring young karters.

Two or more racers, one kart.

The new Rotax E10 is perfect for kids (and their parents). No tinkering. Minimum wear and tear. The E10 can run on one or two batteries. This way, the E10 can „grow“ with your child, or racers of different ages can use the same kart: Just plug in or unplug the secondary battery, and off they go!

Fun first, competition later.

The E10 is available for races and testing in spring 2023 (more information to follow), but we're sure kids will love the boost it gives them. That's why we're aiming to introduce E10 racing classes.

PROFESSIONAL		RECREATIONAL	
E10		E10	
E10 Bambini aged 6-9	E10 Mini aged 9-12	E20 Junior aged 12-14	E20 Senior aged 14+
		Sprint / Slalom use aged 6-99
